

S. No.	Category	Service Name	Description	Documentation Link
1	AI / Management	Agent 365	Control plane for managing and governing AI agents at scale, integrating security, productivity, and compliance tools.	Agent 365 Documentation
2	Networking	Application Gateway	Web traffic load balancer enabling management of traffic to web applications, with WAF and advanced routing.	Application Gateway Documentation
3	Networking / Containers	Application Gateway for Containers	Layer 7 load balancing for containerized workloads, supporting advanced routing and security.	Application Gateway for Containers Documentation
4	Compute	App Service	Fully managed platform for building and hosting web apps, RESTful APIs, and mobile backends.	App Service Documentation
5	Developer Tools / Configuration	App Configuration	Centralized configuration service for application settings and feature flags.	App Configuration Documentation
6	Developer Tools / Testing	App Testing	Holistic app testing with Azure Load Testing and Playwright Workspaces.	App Testing Documentation
7	Hybrid / Multi-cloud	Arc	Extends Azure management and services to any infrastructure, including on-premises and multi-cloud.	Azure Arc Documentation
8	Hybrid / Containers	Arc-enabled Kubernetes	Extends AKS capabilities to Kubernetes clusters running outside Azure.	Arc-enabled Kubernetes Documentation
9	Integration / Developer Tools	API Center	Centralized hub for managing and discovering APIs across environments.	API Center Documentation
10	Integration / Developer Tools	API Management	Platform for creating, publishing, securing, and monitoring APIs at scale.	API Management Documentation
11	Management / Automation	Automation	Automates frequent, time-consuming, and error-prone cloud management tasks.	Automation Documentation
12	AI / Machine Learning	Azure AI Bot Service	Platform for building and deploying AI-powered chatbots.	Azure Bot Services Documentation
13	AI / Security	Azure AI Content Safety	AI-powered service to monitor and filter text and image content for safety and compliance.	Azure AI Content Safety Documentation
14	AI / Machine Learning	Azure AI Custom Vision	Customizable computer vision models for image classification and object detection.	Azure AI Custom Vision Documentation
15	AI / Machine Learning	Azure AI Document Intelligence	AI-powered document extraction and understanding service.	Azure AI Document Intelligence Documentation
16	AI / Machine Learning	Azure AI Face	Detects, identifies, analyzes, and tags faces in images.	Azure AI Face Documentation
17	AI / Integration	Azure AI Foundry (now Microsoft Foundry)	Unified platform for building, deploying, and managing AI agents and tools.	Microsoft Foundry Documentation
18	AI / Integration	Azure AI Gateway	Secure and scalable access to AI models and services via APIs.	Azure AI Gateway Documentation
19	AI / Accessibility	Azure AI Immersive Reader	Empowers users to read and comprehend text with AI-driven tools.	Azure AI Immersive Reader Documentation
20	AI / Machine Learning	Azure AI Language	Natural language processing for sentiment analysis, entity recognition, and more.	Azure AI Language Documentation
21	AI / Search	Azure AI Search	AI-powered cloud search service for indexing and querying content.	Azure AI Search Documentation
22	AI / Media	Azure AI Video Indexer	Unlocks insights from video content using AI.	Azure AI Video Indexer Documentation
23	Analytics	Azure Analysis Services	Enterprise-grade analytics engine as a service.	Azure Analysis Services Documentation

24	Compute	Azure App Service – Managed Instance	Modernizes legacy .NET apps with minimal changes, offering cloud-native scalability and security.	App Service Documentation
25	Hybrid / Multi-cloud	Azure Arc	Extends Azure management and services to any infrastructure.	Azure Arc Documentation
26	Management / Automation	Azure Automanage	Simplifies IT management with automated operations and best practices.	Azure Automanage Documentation
27	Backup / DR	Azure Backup	Reliable backup solution for protecting data in the Microsoft Cloud.	Azure Backup Documentation
28	Security / Networking	Azure Bastion	Secure, seamless RDP and SSH connectivity to VMs without public IPs.	Azure Bastion Documentation
29	Compute / HPC	Azure Batch	Cloud-scale job scheduling and compute management for parallel and HPC workloads.	Azure Batch Documentation
30	Storage	Azure Blob Storage	Object storage for unstructured data, supporting block, append, and page blobs.	Azure Blob Storage Documentation
31	Management / Governance	Azure Blueprints	Enables quick, repeatable creation of governed environments (Preview).	Azure Blueprints Documentation
32	Compute / Storage	Azure Boost	Enhances remote storage throughput and network bandwidth for Azure VMs.	Azure Boost Documentation
33	Databases / Caching	Azure Cache for Redis	Managed Redis service for high-performance caching and data storage.	Azure Cache for Redis Documentation
34	Management / Testing	Azure Chaos Studio	Improves application resilience by introducing faults and simulating outages.	Azure Chaos Studio Documentation
35	Developer Tools	Azure Cloud Shell	Browser-based shell for Azure administration.	Azure Cloud Shell Documentation
36	Communication	Azure Communication Services	Build rich communication experiences with voice, video, chat, and SMS.	Azure Communication Services Documentation
37	Compute	Azure Compute Fleet	Easily provision and manage Azure compute capacity at scale (Preview).	Azure Compute Fleet Documentation
38	Security / Blockchain	Azure Confidential Ledger	Tamperproof, unstructured data store hosted in trusted execution environments.	Azure Confidential Ledger Documentation
39	Compute / Containers	Azure Container Apps	Fully managed serverless container service for building and deploying modern apps at scale.	Azure Container Apps Documentation
40	Compute / Containers	Azure Container Instances	Run containers on Azure without managing servers.	Azure Container Instances Documentation
41	Containers	Azure Container Registry	Private Docker registry for building, storing, and managing container images.	Azure Container Registry Documentation
42	Storage / Containers	Azure Container Storage	Persistent volumes for stateful container applications.	Azure Container Storage Documentation
43	AI / Developer Tools	Azure Copilot	Intelligent assistant for managing Azure workloads and services.	Azure Copilot Documentation
44	Databases	Azure Cosmos DB	Globally distributed, multi-model database service for mission-critical applications.	Azure Cosmos DB Documentation
45	Storage / Data Transfer	Azure Data Box	Appliances and solutions for data transfer to Azure.	Azure Data Box Documentation
46	Analytics	Azure Data Explorer	Fast and highly scalable data exploration service.	Azure Data Explorer Documentation
47	Integration / Analytics	Azure Data Factory	Hybrid data integration at enterprise scale, with data pipelines and ETL.	Azure Data Factory Documentation

48	Storage / Analytics	Azure Data Lake Storage	Massively scalable, secure data lake functionality built on Azure Blob Storage.	Azure Data Lake Storage Documentation
49	Specialized / Agriculture	Azure Data Manager for Agriculture	Data platform for agriculture innovation (Preview).	Azure Data Manager for Agriculture Documentation
50	Integration / Data	Azure Data Share	Service for sharing big data with external organizations.	Azure Data Share Documentation
51	Databases	Azure Database for MariaDB	Managed MariaDB database service (Retired as of September 2025).	Azure Database for MariaDB Migration Guidance
52	Databases	Azure Database for MySQL	Managed MySQL database service for app development and deployment.	Azure Database for MySQL Documentation
53	Databases	Azure Database for PostgreSQL	Managed PostgreSQL database service with flexible server deployment options.	Azure Database for PostgreSQL Documentation
54	Migration	Azure Database Migration Service	Simplifies on-premises database migration to the cloud.	Azure Database Migration Service Documentation
55	Analytics	Azure Databricks	Apache Spark-based analytics platform for big data and AI.	Azure Databricks Documentation
56	Security / Networking	Azure DDoS Protection	Protects applications from Distributed Denial of Service (DDoS) attacks.	Azure DDoS Protection Documentation
57	Compute	Azure Dedicated Host	Dedicated physical server to host Azure VMs for Windows and Linux.	Azure Dedicated Host Documentation
58	DevOps / Developer Tools	Azure DevOps	Services for teams to plan, collaborate, and ship software faster.	Azure DevOps Documentation
59	DevOps / Developer Tools	Azure DevTest Labs	Create and manage IaaS VMs in lab environments for testing and development.	Azure DevTest Labs Documentation
60	IoT / Analytics	Azure Digital Twins	Platform for modeling and creating digital representations of real-world environments.	Azure Digital Twins Documentation
61	Storage	Azure Disk Storage	High-performance, highly durable block storage for Azure VMs.	Azure Disk Storage Documentation
62	Networking	Azure DNS	Ultra-high availability and performance for domain name system (DNS) hosting.	Azure DNS Documentation
63	Databases	Azure DocumentDB	Open-source, MongoDB-compatible document database service for hybrid and multicloud.	Azure DocumentDB Documentation
64	Storage	Azure Elastic SAN	Cloud-native Storage Area Network (SAN) service.	Azure Elastic SAN Documentation
65	Integration / Messaging	Azure Event Grid	Fully managed event routing service for building event-driven architectures.	Azure Event Grid Documentation
66	Integration / Messaging	Azure Event Hubs	Big data streaming platform and event ingestion service.	Azure Event Hubs Documentation
67	Networking	Azure ExpressRoute	Dedicated private network fiber connections to Azure.	Azure ExpressRoute Documentation
68	Storage	Azure Files	Secure, serverless enterprise-grade cloud file shares.	Azure Files Documentation
69	Security / Networking	Azure Firewall	Managed, cloud-based network security service for Azure Virtual Network resources.	Azure Firewall Documentation
70	Security / Management	Azure Firewall Manager	Central security policy and routing management for cloud-based security perimeters.	Azure Firewall Manager Documentation
71	Developer Tools / Collaboration	Azure Fluid Relay	Real-time collaborative experiences for apps using Fluid Framework.	Azure Fluid Relay Documentation
72	Networking / CDN	Azure Front Door	Scalable and secure entry point for fast delivery of global applications.	Azure Front Door Documentation
73	Compute	Azure Functions	Event-driven serverless compute platform for running code without managing infrastructure.	Azure Functions Documentation

74	Specialized / Healthcare	Azure Health Data Services	Unified solution for managing FHIR, DICOM, and MedTech data with advanced analytics.	Azure Health Data Services Documentation
75	Compute / HPC	Azure HPC (ND GB300 v6)	High-performance computing VMs optimized for generative and agentic AI workloads.	Azure HPC Documentation
76	Databases	Azure HorizonDB	High-performance PostgreSQL cloud database with advanced vector indexing and AI-readiness (Preview).	Azure HorizonDB Documentation
77	IoT	Azure IoT Central	Application platform as a service (aPaaS) for IoT solutions.	Azure IoT Central Documentation
78	IoT / Edge	Azure IoT Edge	Deploy, run, and monitor containerized workloads at the edge.	Azure IoT Edge Documentation
79	IoT	Azure IoT Hub	Managed service for secure communication between IoT applications and devices.	Azure IoT Hub Documentation
80	IoT / Edge	Azure IoT Operations	Unified data plane for edge-based IoT solutions, supporting adaptive cloud approach.	Azure IoT Operations Documentation
81	Security	Azure Key Vault	Securely store and access secrets, keys, and certificates.	Azure Key Vault Documentation
82	Containers / Management	Azure Kubernetes Fleet Manager	Manage multiple AKS clusters at scale across environments.	Azure Kubernetes Fleet Manager Documentation
83	Containers / Compute	Azure Kubernetes Service (AKS)	Managed Kubernetes container orchestration service.	Azure Kubernetes Service Documentation
84	Networking	Azure Load Balancer	Distributes incoming network traffic across backend resources for high availability.	Azure Load Balancer Documentation
85	Developer Tools / Testing	Azure Load Testing	Generate high-scale load and run performance tests for web applications and services.	Azure Load Testing Documentation
86	Integration	Azure Logic Apps	Automates workflows and integrates apps, data, services, and systems.	Azure Logic Apps Documentation
87	Management / Governance	Azure Managed Applications	Simplifies management of cloud offerings with managed application lifecycle.	Azure Managed Applications Documentation
88	Monitoring / Visualization	Azure Managed Grafana	Deploy Grafana dashboards as a fully managed Azure service.	Azure Managed Grafana Documentation
89	Databases	Azure Managed Instance for Apache Cassandra	Automate deployment and scaling for managed open-source Apache Cassandra datacenters.	Azure Managed Instance for Apache Cassandra Documentation
90	Storage / HPC	Azure Managed Lustre	Managed Lustre file system for high-performance computing and AI workloads.	Azure Managed Lustre Documentation
91	Databases / Caching	Azure Managed Redis	Managed Redis service for high-performance caching and data storage.	Azure Cache for Redis Documentation
92	Developer Tools / Location	Azure Maps	Location APIs for geospatial context and mapping.	Azure Maps Documentation
93	Marketplace	Azure Marketplace	Online store for buying and selling cloud solutions certified to run on Azure.	Azure Marketplace Documentation
94	Media	Azure Media Services	Cloud-based platform for encoding, storing, and streaming audio and video (Retired as of June 2024).	Azure Media Services Retirement Guide
95	Migration	Azure Migrate	Central hub for tools to start, execute, and track migration to Azure.	Azure Migrate Documentation
96	Monitoring / Observability	Azure Monitor	Full-stack monitoring service for collecting, analyzing, and acting on telemetry data.	Azure Monitor Documentation
97	Storage	Azure NetApp Files	Enterprise-grade Azure file shares powered by NetApp.	Azure NetApp Files Documentation

98	Networking / Monitoring	Azure Network Watcher	Tools to monitor, diagnose, and gain insights into your network.	Azure Network Watcher Documentation
99	AI / Machine Learning	Azure OpenAI Service	Access to advanced language models like GPT-4 and Codex for various use cases.	Azure OpenAI Service Documentation
100	Networking / Analytics	Azure Operator Insights	Analyze network data from multiple sources for telco and operator scenarios.	Azure Operator Insights Documentation
101	Networking / Hybrid	Azure Operator Nexus	Carrier-grade, hybrid cloud platform for mission-critical mobile networks.	Azure Operator Nexus Documentation
102	Networking / Management	Azure Operator Service Manager	Manage network services across hybrid cloud sites.	Azure Operator Service Manager Documentation
103	Management / Governance	Azure Policy	Implement corporate governance and standards at scale for Azure resources.	Azure Policy Documentation
104	Networking / Security	Azure Private Link	Private access to services hosted on the Azure platform, keeping data on the Microsoft network.	Azure Private Link Documentation
105	Security / Governance	Azure Purview	Unified data governance solution for managing and protecting data.	Azure Purview Documentation
106	Specialized / Quantum	Azure Quantum	Full-stack quantum computing ecosystem with access to diverse quantum hardware.	Azure Quantum Documentation
107	Containers	Azure Red Hat OpenShift	Fully managed OpenShift service jointly engineered, operated, and supported by Microsoft and Red Hat.	Azure Red Hat OpenShift Documentation
108	Security / SIEM	Azure Sentinel (Microsoft Sentinel)	Cloud-native SIEM and SOAR platform for intelligent security analytics and threat detection.	Microsoft Sentinel Documentation
109	Integration / Messaging	Azure Service Bus	Reliable cloud messaging as a service (MaaS) for hybrid integration.	Azure Service Bus Documentation
110	Backup / DR	Azure Site Recovery	Built-in disaster recovery service for business continuity.	Azure Site Recovery Documentation
111	Security / IoT	Azure Sphere	Secure, connected microcontroller units (MCUs) and a cloud-based security service.	Azure Sphere Documentation
112	Databases	Azure SQL Database	Fully managed relational database with built-in intelligence.	Azure SQL Database Documentation
113	Databases	Azure SQL Managed Instance	Managed SQL Server instance with near 100% compatibility with SQL Server.	Azure SQL Managed Instance Documentation
114	Hybrid / Edge	Azure Stack Edge	Azure managed appliance bringing compute, storage, and intelligence to the edge.	Azure Stack Edge Documentation
115	Hybrid / Edge	Azure Stack Hub	Integrated hardware system with Azure software for on-premises cloud.	Azure Stack Hub Documentation
116	Storage	Azure Storage	Durable, highly available, and massively scalable cloud storage.	Azure Storage Documentation
117	Analytics	Azure Stream Analytics	Real-time analytics on fast-moving streams of data from applications and devices.	Azure Stream Analytics Documentation
118	Analytics	Azure Synapse Analytics	Limitless analytics service with unmatched time to insight.	Azure Synapse Analytics Documentation
119	Compute / VDI	Azure Virtual Desktop	Virtual desktop infrastructure with support for external identities and integration with Windows 365.	Azure Virtual Desktop Documentation
120	Compute	Azure Virtual Machines	On-demand scalable computing resources with support for Windows and Linux.	Azure Virtual Machines Documentation
121	Networking	Azure Virtual Network (VNet)	Provides secure, private network connectivity in Azure.	Azure Virtual Network Documentation

122	Networking	Azure Virtual Network Manager	Centralized network management service for managing connectivity and security policies.	Azure Virtual Network Manager Documentation
123	Hybrid / Virtualization	Azure VMware Solution	Run VMware workloads natively on Azure.	Azure VMware Solution Documentation
124	Networking	Azure VPN Gateway	Secure, encrypted communication between Azure VNets and on-premises networks.	Azure VPN Gateway Documentation
125	AI / Integration	Foundry Agent Service	Service for hosting and managing AI agents with support for custom and prebuilt tools.	Foundry Agent Service Documentation
126	AI / Search	Foundry IQ by Azure AI Search	AI-powered search capabilities integrated into Microsoft Foundry.	Foundry IQ Documentation
127	AI	Foundry Tools	Suite of AI services for building intelligent applications, rebranded under Microsoft Foundry.	Foundry Tools Documentation
128	Security	Microsoft Defender for Cloud	Unified posture management and threat protection across cloud-native apps, serverless resources, and AI agents.	Defender for Cloud Documentation
129	Security / Identity	Microsoft Entra ID (formerly Azure Active Directory)	Cloud-based Identity and Access Management (IAM) service.	Microsoft Entra ID Documentation
130	Data / Analytics	Microsoft Fabric	End-to-end analytics platform integrating data integration, engineering, and business intelligence.	Microsoft Fabric Documentation
131	Security / Management	Microsoft Intune	Endpoint management platform with Security Copilot agents and admin controls.	Microsoft Intune Documentation
132	Marketplace	Microsoft Marketplace	Global catalog of AI apps and cloud solutions from over 500,000 partners.	Microsoft Marketplace Documentation
133	Security / Governance	Microsoft Purview	AI-powered data security and compliance platform.	Microsoft Purview Documentation
134	Security / SIEM	Microsoft Sentinel	AI-ready SIEM platform with enhanced data lake, graph, and threat intelligence integration.	Microsoft Sentinel Documentation
135	Security / AI	Security Copilot	Embedded AI agents for alert triage, threat hunting, identity management, and data protection.	Security Copilot Documentation
136	Compute / Cloud PC	Windows 365	Cloud PC platform with AI-enabled features and integration with Microsoft Intune.	Windows 365 Documentation
